How to get the best of AI tools in research

Dies ist ein Angebot von BERD@NFDI:

„Do you ever feel overwhelmed in selecting which AI tools could be useful to support you in your daily work?

Following the strong demand for this online course last year, we are pleased to bring it back and invite you to 'How to Get the Best of AI Tools in Research,' held on March 3 & 10, 2026.

Led by Melanie Clegg, the course introduces key AI tools - such as Large Language Models - and how to use them effectively throughout the research process. Topics include project planning, literature review, data analysis, communication, and ethical considerations.

The course combines two live sessions with a hands-on exercise in between.

Participation is free of charge. In return, we kindly ask all participants to support our evaluation process.

Please apply by January 31, 2026.
